

## A Simple Guide to Taking Care of Your Outdoor Banner

To store, roll the banner loosely. This makes sure the print only touches the back of the banner and will not stick. Your vinyl banner should be completely dry before being stored - to minimise risk of mildew

Never fold the banner and let the print touch other parts of the print. This could cause the print to stick together and destroy the banner.

## Cleaning Your Banner

To clean the banner use a soft sponge with soapy water. Be careful not to scratch the print.

Never use chemical cleaners on the banner as it could damage the print
